PROJECTS

FocusForge – Deep Work Command Centre

React.js, Tailwind CSS Demo

- Engineered a full-featured productivity dashboard with task organization, focus tracking, and productivity analytics for structured deep-work sessions.
- Built a fully responsive interface for desktop and mobile using React.js and Tailwind CSS with reusable component architecture.
- Implemented performance optimizations resulting in fast load times and a smooth, consistent user experience across devices.

Cortex – Modern Web Application

HTML5, CSS3, JavaScript Demo

- Shipped a production web application with minimal UI/UX focus — removed visual noise, optimized for performance and usability
- Built with vanilla HTML5, CSS3, and JavaScript using scalable, maintainable component patterns

GitVerse – GitHub Profile Explorer

HTML5, CSS3, Vanilla JavaScript, GitHub REST API Demo

- Developed a responsive GitHub profile explorer using HTML5, CSS3, Vanilla JavaScript, and the GitHub REST API.
- Implemented asynchronous API requests to retrieve public profiles and repositories, including languages, star counts, biographies, and profile links.

Personal Portfolio Website

Responsive Web Design, Lazy Loading, Vercel Demo

- Designed, developed, and deployed a professional portfolio on Vercel showcasing projects, skills, and development experience.
- Implemented responsive design, performance optimizations, and lazy loading for fast, cross-device accessibility.
